Products

Services

Architecture & Design

We supply network and design services for all advanced RF infrastructure solutions to enhance the network coverage, redundancy and backup capabilities

Key Offerings:

- Consulting services by our experts in network planning and design
- Joint planning sessions with client personnel
- Analysis and evaluation of client requirements

Overview

Products

Services

Deployment & Installation

Our team cooperates with our clients to manage all aspects of the solution implementation for rapid and error-free network deployment

Key Offerings:

- Fast support response time, availability via email, phone and Skype
- Site Acceptance Tests, providing live technical support throughout the installation of an exemplary first link and postliminary testing

Overview

Products

Services

Management & Optimization

We provide expert managing and optimizing services to existing networks. Our NMS solution improves productivity and automates monitoring processes

Key Offerings:

- AL Wireless NMS solution and software support
- Professional analysis & consult on network optimization and efficiency

Overview

Products

Services

Support & Repairs

AL Wireless personnel consist of knowledgeable, professional and customer oriented support engineers that are available at all times

Key Offerings:

- Remote guidance of clients & on-site personnel including telephonic support, troubleshooting and network administration
- Supplying best-practice maintenance professional documentation

Overview

Products

Services

Training & Studies

Client's personnel training on specific tools and methodologies, as well as hands-on training to ensure the clients knowledge with setting-up and maintaining network infrastructure

Key Offerings:

- Made-to-order procedures, manuals and product documentations
- Host training sessions at company's facilities
